

David Quartarolo

Living with Technology - Keeping your Home Secure

Home networking can seem difficult enough before you even factor in security. There are more internet-connected devices that are in our homes than ever before and now they seem to be constantly under attack. In this session David Quartarolo will discuss how to evaluate your security posture and mitigate some of your risk. It's time to survive and thrive in our home networks!

Biography

David Quartarolo knows the importance of secure networks. His interest in the Linux operating system, networking, and development led him to Wilmington University where he majored in Computer and Network Security. David was a finalist in 2019 for the San's Institute Cyber Fast Track competition and received a scholarship to their Applied Cybersecurity certificate program. He is currently working as an Information Systems Security Engineer at Sectigo. David spends his time off with his Wife and son.
