

Timothy Mullen

Impacts of Ransomware on Operational Technology

Biography

Timothy Mullen is an OT cybersecurity team lead at Applied Control Engineering, Inc. (ACE). At ACE, Tim leads projects to assess and remediate cyber vulnerabilities that impact industrial control systems and other Operational Technologies used in many industries. Prior to ACE, Tim worked in commercial nuclear power performing cybersecurity assessments of plant control upgrades. Tim holds a Bachelors in Computer Engineering from the Johns Hopkins University, and is a Global Industrial Cyber Security Specialist (GICSP).
