

## H. Lane Williams

### **Protecting Your Web and Mobile Applications Against the Next Wave**

First there was DDoS, then attacks against flaws or libraries in the application. We protected against those attacks with equipment to scrub DDoS traffic and Web Application Firewalls to protect the application. How can we protect against automation and manual fraud pretending to be your customers?

#### *Key Takeaways:*

1. Understand attackers methods and tools
2. Learn the top 10 tips for stopping credential stuffing attacks

### **Biography**

Lane Williams is Director of Solutions Engineering where he leads a North American based team evangelizing F5's Distributed Cloud Security and services. Lane has an extensive background in web performance, monitoring, and security. Prior to joining F5, Lane held leadership positions with Instart Logic, Strangeloop Networks, and Akamai Technologies.
