The Threats Cybersecurity Poses to Physical Security

Outline

- Introduction
- > Healthcare
- > Transportation
- Energy
- Trend Analysis
- Big Picture
- Future
- Takeaways

Introduction

Scope

Past five years

- Attribution to nation -states/political motives
 - Level of attack requires resources

What is Physical Security?

- Protection of physical systems
 - People, property, assets involved

> A tenant of the wellbeing of the physical world

Historic Attack: Stuxnet

Computer Worm (2009)

- Allegedly USA
 - Operation Olympic Games

Destroyed near 1000 Iranian centrifuges

Energy & Smart Grid

Colonial Pipeline

May 7, 2021

- Attributed to Darkside Hacker Group
 - Located in Eastern Europe

Ransomware Attack

- Energy insecurity: cut off supply to East Coast for days
 - Moves 45% of all fuel consumed on East Coast

Ukraine Viasat Attack

- Russian military intelligence (GRU)
- Acid Rain
 - DDoS & malware wiper
- US satellite internet provider
 - European network outages
 - Coincide with physical invasion

Feb 24, 2022

- Attributed to Chinese government
 - Attacked early April, stayed late April

Zero-day vulnerability in Pulse Connect Secure

- No severe damages
 - > 3/18 systems impacted

Metrolinx Attack

January, 2018

Provincially run Toronto suburban transit authority

- Attributed to North Korea
 - Routed through Russia

- Firewall breach and malware
- No severe damages

Conti Ireland Hospital

- Russian cybercrime group
 - Possible ties to Russian government

- Ransomware as Service
 - Two months between intrusion and attack

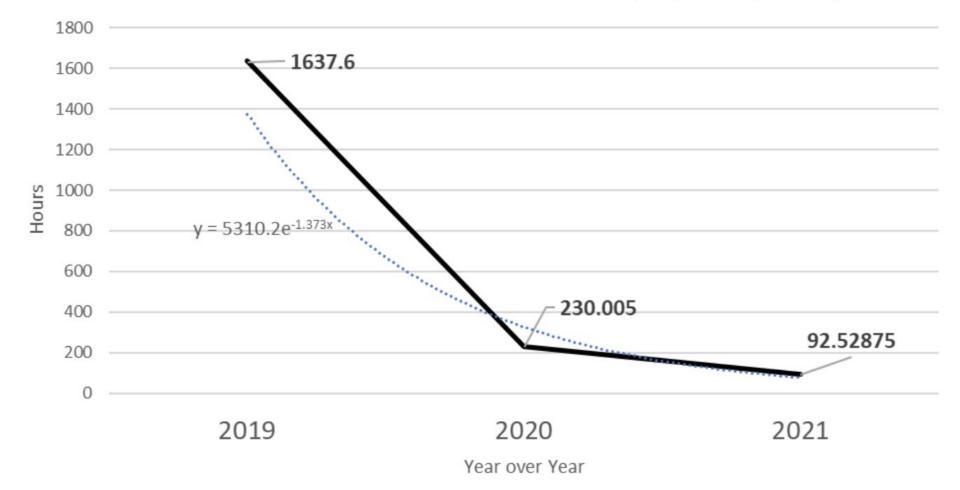

- Delayed hospital functions
 - Hospital treatments, surgeries

May, 2022

- Attributed to North Korea
 - Initial access vectors unknown

- Encrypt medical data
 - electronic health records, diagnostics, imaging, and intranet
- Delay hospital operations

Initial Access via Broker to Ransomware Deployment (Hours)

Trend Analysis

- Energy
 - Widespread effect on operations

- Transportation
 - Reconnaissance

 - Healthcare
 - Increasingly at risk post Covid
 - Loss of life

Trend Analysis

- > Chaos
- Malware & DDOS
 - specifically ransomware
- Physical damage to loss of life
 - Infrastructure increasingly at risk

Human Security

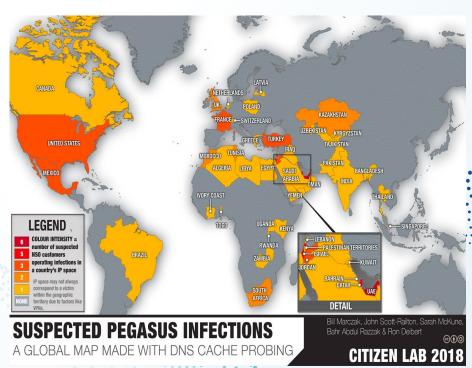

United Nations Framework

- Seven components of human security
 - Personal
 - Community
 - Economic
 - Political
 - Food
 - Health
 - Environment

Putting Human Security in Context

- Pegasus Spyware (2016)
 - Israeli cyber weapons firm NSO Group

- Insecurity of phone, info, people
 - Personal
 - Community
 - Economic
 - Political

Big Picture

Cybersecurity is Human Security

- Various intentions
 - Deliberate physical threats
 - Physical threat is byproduct

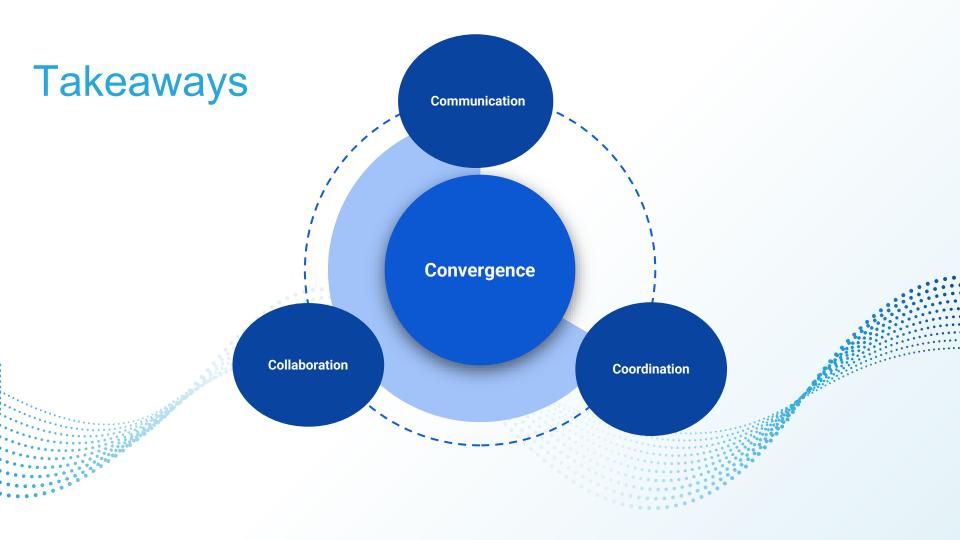

Immense resources

Future of Cyberspace

> Attribution issue

> Spillover effects

Declaration of war
