

Andy Ziegler

You've been hacked! Now what

A good cyber-defense can prevent an attack and/or limit damage. But even the best defenses can fail against a determined opponent. In this session, we will show you how to plan a rapid response and recovery effort to get your company back up and operating following a compromise. We will also review what the elements of an IT disaster recovery plan should contain and how it compliments your overall business continuity strategy and program.

Biography

Andy is a Certified Business Continuity Professional through [DRII](#). Andy has worked for large corporations specializing in risk management, business continuity and technology controls for 25 years. Andy helped navigate his employers through major disasters such as 9/11, Hurricanes Sandy and Katrina and many others.

Andy is a 16 year first responder with Talleyville Fire Company and currently serves on the Board of Directors.
