

## Sean Ebeling

### **Stories from the Field**

Join Sean for a discussion of several real-world stories including social engineering, cloud misconfiguration, and a NGAV POC that uncovered a Russian Reverse Shell for a County Government. He will also describe situations where companies have been breached and backups being deleted by the adversary. Along with the stories, Sean will discuss lessons learned including mitigation and remediation steps.

### **Biography**

Sean is a 30 year IT professional with architecture positions in both healthcare and pharma. He has a leadership degree from Villanova. He is a Certified Information System Security Professional (CISSP) and has Security Plus and an Imprivata Certified Engineer. Sean wrote his first program in 1981 on a C64. He likes to tinker with Raspberry PI and Arduino. For fun, Sean has built his own arcade cabinet and brews beer. He has a wife and 2 children.
