

## FREQUENTLY ASKED QUESTIONS

**What is Girls GoCyber Start?**

- Girls Go CyberStart is a free, forward-thinking cybersecurity skills program designed to educate and inspire high school girls to discover the opportunities and rewards offered by a career in cybersecurity. As part of CyberStart Game, participants will take on the roles of agents in the Cyber Protection Agency, where they will develop forensics and analysis skills and deploy them to sleuth through challenges and tackle various online cybercriminal gangs. As they work their way through the game, players will be challenged to solve puzzles and be introduced to a broad spectrum of cybersecurity disciplines, including forensics, open-source intelligence, cryptography, and web application security.
- In 2018, 287 girls represented 113 teams from 26 Delaware high schools that participated in Girls Go CyberStart. The goal for 2019 is to increase those numbers even more.

**What is the duration of the program?**

- Registration opens on February 18, additional details on the duration of the program are on following pages

**What additional equipment would need to be provided?**

- None, participants can use school computers or their own personal computers.

**Do I have to be a teacher in Science, Technology, Math or Engineering to participate?**

- No, the participants will be guided through the game to complete the various challenges. We are counting on you to encourage the participants.

**How much time would I need to invest?**

- Mentoring the participants requires minimal time and involves mostly checking participants' status in the game. The participants typically work on challenges outside of school hours.

**What is the associated cost?**

- None
