

## William R. Denny

### **Changing Legal Landscape in Cybersecurity: Implications for Business**

Recent decisions in the areas of banking liability, Executive Orders on critical infrastructure and Federal Trade Commission actions have transformed cybersecurity responsibilities. Companies now have greater risks of being found negligent if unprepared for a cyber attack. This session will update you on the latest developments, review the current and upcoming regulatory landscape, and discuss the implications for businesses as they seek to protect their critical infrastructure and comply with laws and regulations for data protection.

### **Biography**

Mr. Denny practices primarily in the areas of electronic commerce, information licensing, and commercial litigation. He has represented both public and privately held companies in a wide range of technology and intellectual property-related transactions, including outsourcing of IT services, mergers and acquisitions, technology licensing, software development, sales of Internet domain names, and the development of ecommerce on Web sites. Clients include major licensees of information technology as well as Internet service providers, software developers and system integration service providers.

Bill has litigated disputes over the interpretation and enforcement of many types of technology contracts, general commercial contracts and liability insurance policies; he has tried jury and non-jury cases in federal and state trial and appellate courts, before arbitration panels, and by use of other alternative dispute resolution techniques.

Bill writes extensively on technology and business issues, including:  
“Survey of Recent Developments in the Law of Cloud Computing and Software as a Service Agreements

" The Business Lawyer, Vol. 66, No. 1 (Nov. 2010)

"Survey of Privacy Law Developments in 2009: United States, Canada, and the European Union," The Business Lawyer, Vol. 65, No. 1 (Nov. 2009)
