

Timothy G. Brown

Security's Evolving Role as an Enabler to the Business

Technical Track: Intermediate

How much more could your organization accomplish if security was not holding you back? Security has long been the practice of denial and restriction. Tim Brown from Dell Security will explore changing that model; allowing IT security to become an enabler of growth and innovation.

Biography

Tim Brown is at the front line of the most vexing challenge facing organizations today: IT security. As a former CTO, chief architect, distinguished engineer and director of security strategy, Tim deeply understands the challenges and aspirations of the person responsible for driving digital innovation and change. Tim has over 20 years of experience developing and implementing security technology, including identity and access management, security compliance, threat research, vulnerability management, encryption, managed security services and cloud security.

Today, as a Dell Fellow and the CTO of Dell Security, Tim is developing the future of IT security, and it's a future that is addressing customers' biggest challenges using a proactive, rather than a reactive, approach. His strong industry knowledge in finance, healthcare, education, manufacturing, retail and government enables Tim to provide relevant and actionable insights.

Nationally, his trusted advisor status has taken him from meeting with members of Congress and the Senate to the Situation Room in the White House. He has been on the board of the Open Identity Exchange and a member of the Trans Global Secure Collaboration Program driving advancements in identity frameworks and working with the US government on security initiatives. He is a member of the Advisory board for Clemson University and holds 20+ patents on security related topics.
