

Johan Hybinette

Your Identity, Now it is Mine

Technical Track: Beginner

Breaches are common these days. We have all heard about the Target and Home depot breaches and droves of credit card numbers stolen. It is low risk to you as a credit card is compromised. All you do is dispute the charges and get another one. Your SSN and personal identity is another story. There is nothing protecting you here and a ruined identity can easily destroy quality of life. It is very simple for a thief to steal ones identity and exploit it. This talk will review in detail how they are stolen and exploited. Harvesting technologies like Pineapples and Drones will be reviewed. Showing how much risk you have all the time.

Biography

Mr. Hybinette is the CISO of HOSTING.com. Johan, a veteran information security professional and evangelist with over 25 years' experience. Historically focused on providing CISO services to corporations. Mr. Hybinette possesses a unique "black/white hat" perspective finding innovative ways to maintain and improve information security infrastructures. Deep compliance knowledge including and not limited to HIPAA, PCI, GLBA, NIST, FISMA, ISO 27K, and Sarbanes Oxley.

When he isn't glued behind a computer screen, he spends time, tinkering with race cars, lock picking, reverse engineering, and trying very hard not be the worst cook in the Rockies.
