

Ray Pompon

7 Things that Threat Intelligence Can Teach Us to Help Secure Small Business

F5 Labs has spent the past two years analyzing and combining data on cyber-attacks from a variety of F5 internal sources and external partners including breach data, surveys of security pros, malware forensics, global honeypot nets, and customer incident reports. To make this easy to smaller orgs, we break this into 7 actionable items covering the most common and dangerous attack trends in web attacks, cart jacking, phishing, credential attacks, patching fails, IoT dangers, and email hacks.

Biography

Ray Pompon is a Principal Threat Research Evangelist with F5 Labs where he regularly publishes research reports on cyber-threat activities. With over 20 years of experience in security, he has worked closely with Federal law enforcement in cyber-crime investigations. Ray has been a speaker at national and international conferences, including RSA, Blackhat, and IT Expo Europe. He is the author of IT Security Risk Control Management: An Audit Preparation Plan from Apress books.
