

## Will Snape

### **Adapting to Fight Back: How Cyber AI Neutralizes Never-Before-Seen Threats**

The primary topics will be looking at how much the Cyber Threat Landscape has evolved over the past decade, and how the emergence of sophisticated, machine-speed attacks demand a unique, AI based approach to cyber defense. Will also cover how a mass-migration to Cloud systems impact security.

The audience to come away from this presentation with a new perspective on the Threat Landscape in 2019, and new, innovative approaches to combating it.

### **Biography**

Will Snape is an Account Manager and CyberSecurity Expert at Darktrace, the world's leading artificial intelligence company for cyber defense and the creator of autonomous response technology. He partners with leading disruption solution providers like MTM Technologies and has worked extensively with clients across numerous industry verticals, from healthcare to finance, helping them deploy Darktrace's Enterprise Immune System, the only AI technology capable of detecting and autonomously responding to early-stage cyber-threats. Snape graduated with a bachelor's degree from Trinity College and is based out of Darktrace's New York office.
