Achieve more together

Achieve more together

Create great work with
Word, Excel, and
PowerPoint

Meet Cortana, your
new digital personal
assistant

Connect with
customers, coworkers,
and suppliers

Bring together
everything your team
needs, in one place

Achieve more together: deep dive

Email, schedule, meet, and chat

Stay **connected and in sync** with co-workers and customers wherever you are via email, phone, online meetings, and IM.

Get **professional-looking email** powered by Microsoft Exchange.

Add **audio/video conferencing** to a new or existing meeting with just one click using Outlook with Skype for Business integration.

Use Office 365 Groups to give your teammates access to a **shared inbox, calendar, file repository, and notebook**.

← BACK TO THE DEEP DIVE

Create and collaborate

Create, share, and co-author Word documents, Excel spreadsheets, and PowerPoint presentations with coworkers.

OneDrive for Business enables online and offline access and **automatic syncing** of files to reflect the most recent edits.

SharePoint is an **easy drag and drop intranet** for documents and files.

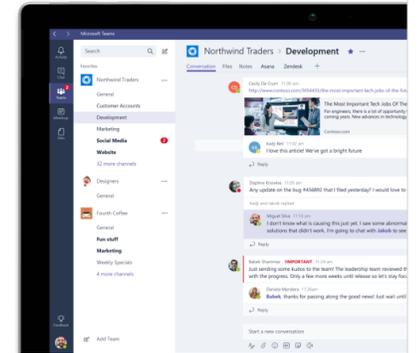

← BACK TO THE DEEP DIVE

Microsoft Teams

Stay connected with **chat, calls, and meetings** within your team and in private or small group conversations.

Schedule and join online Skype meetings with **HD video, VoIP, and dial-in audio conferencing** options.

Share your files, apps or desktop in **online meetings** and review the important moments later with transcriptions of recorded content.

Anywhere it matters

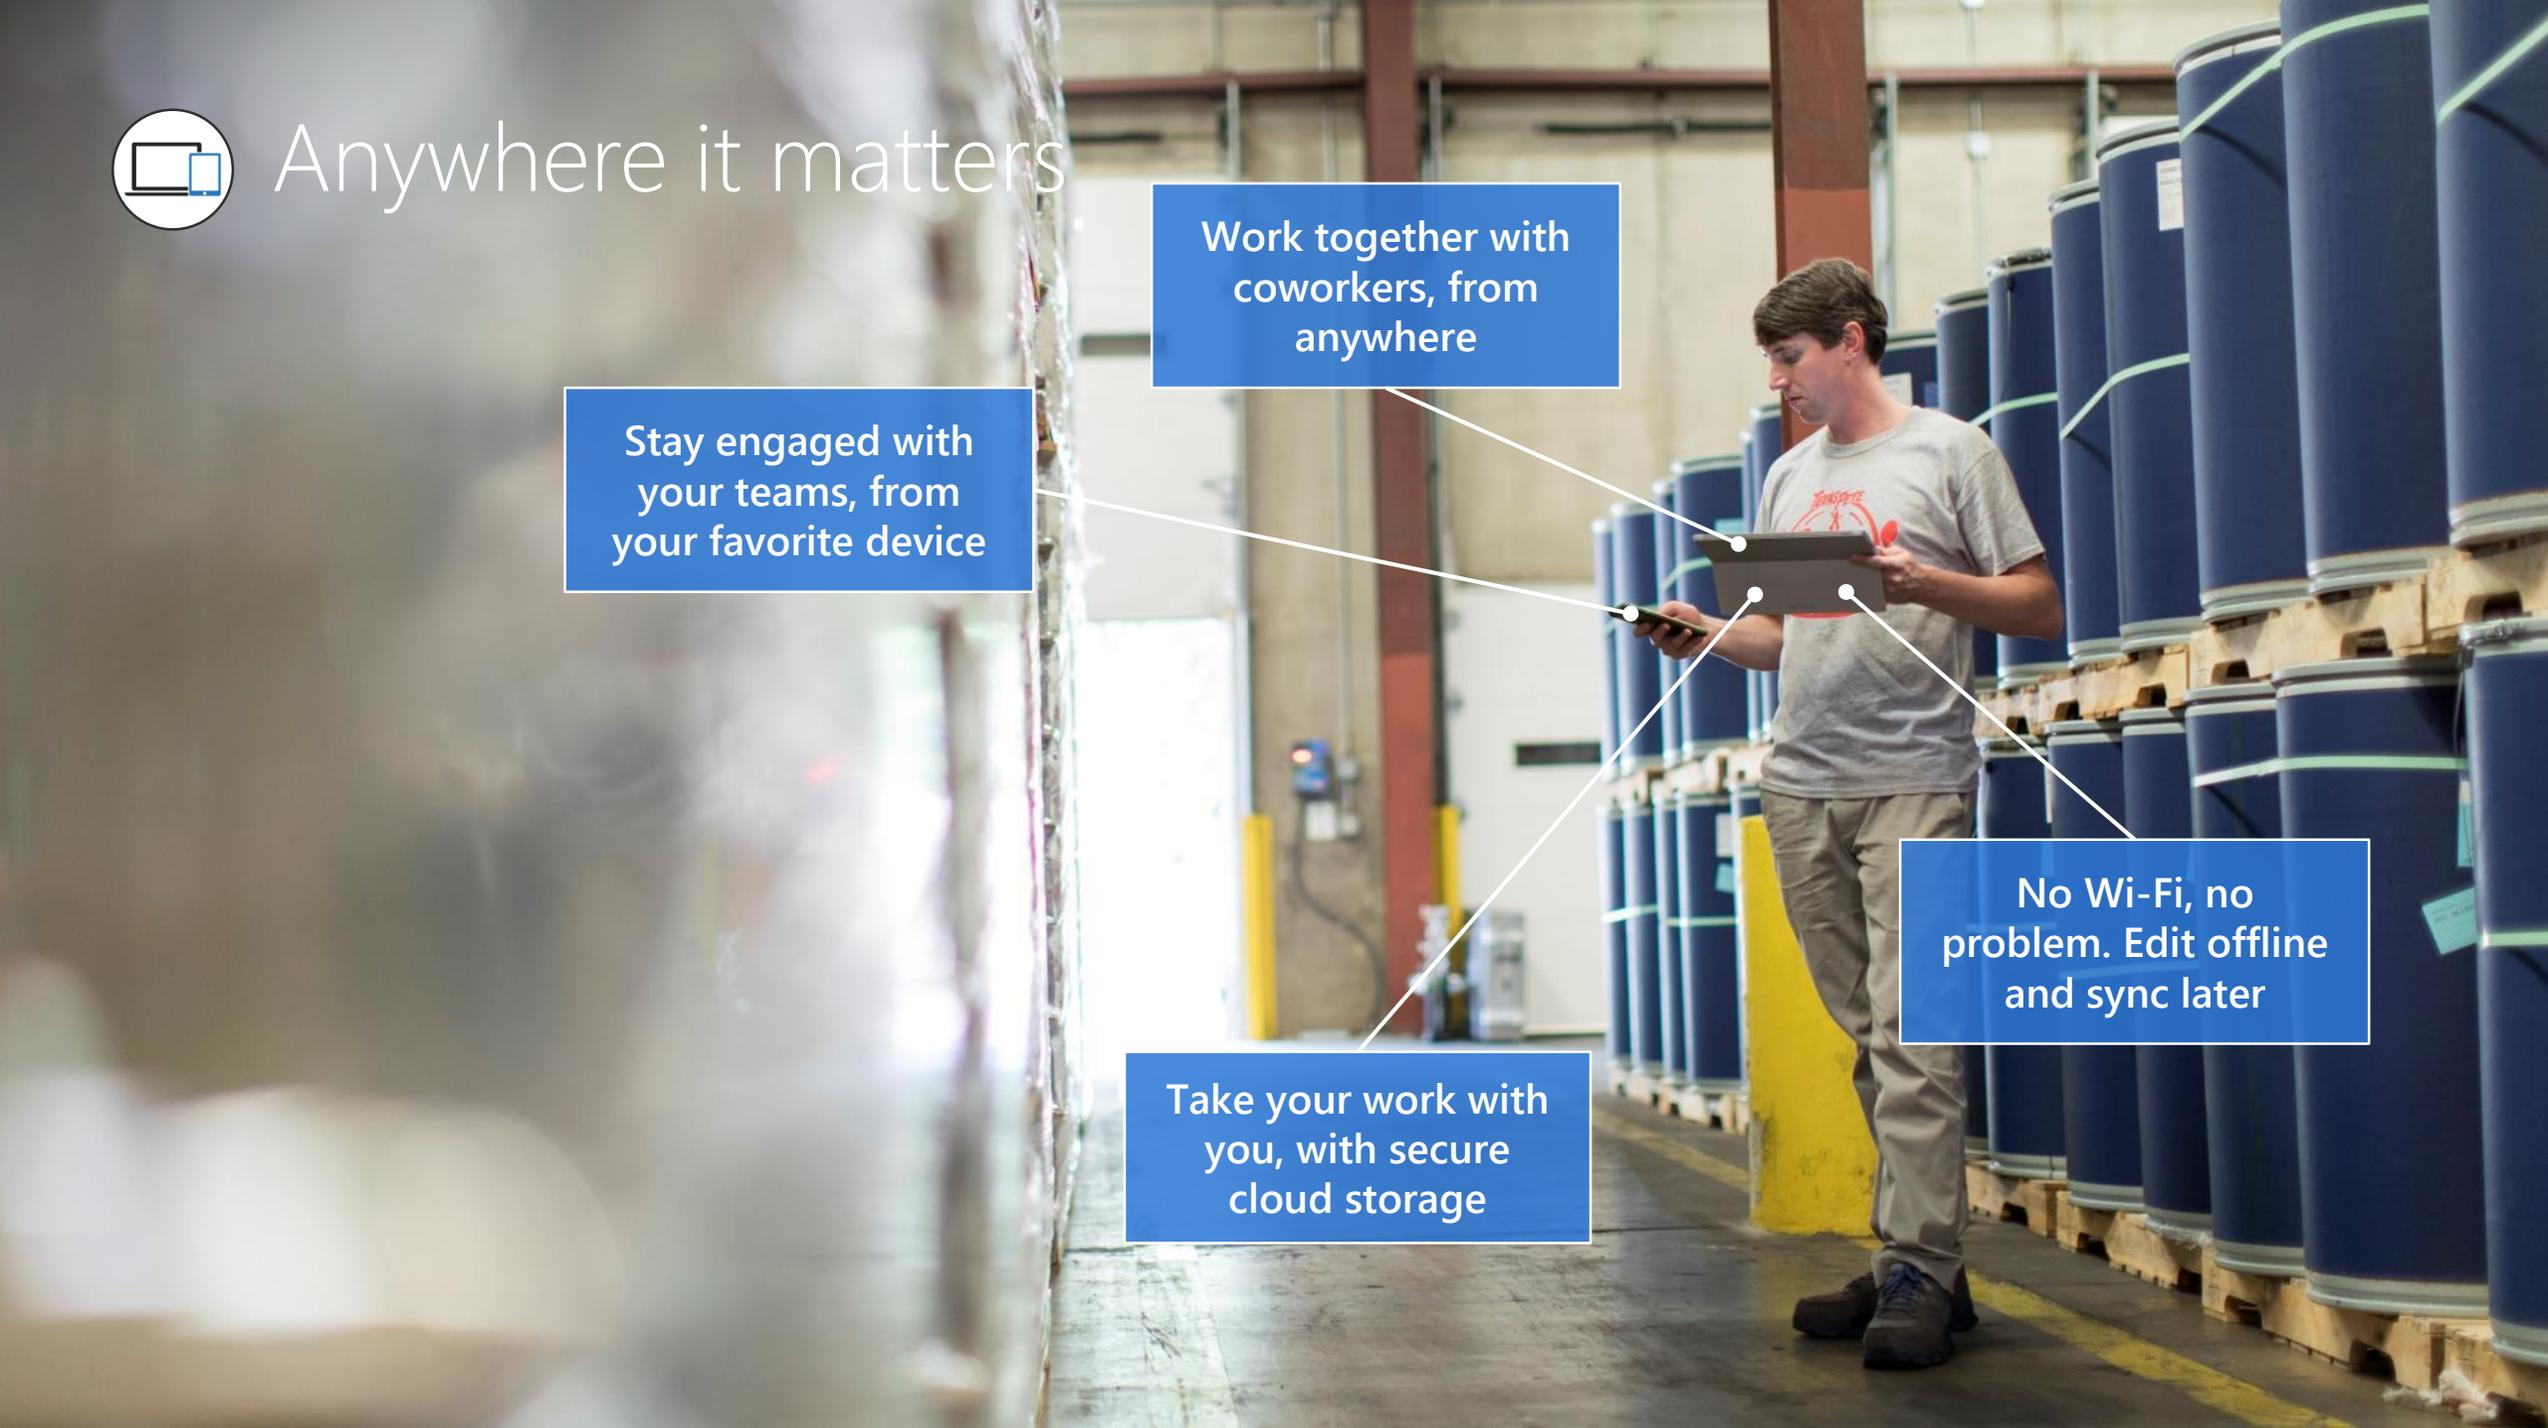

Anywhere it matters

Work together with coworkers, from anywhere

Stay engaged with your teams, from your favorite device

No Wi-Fi, no problem. Edit offline and sync later

Take your work with you, with secure cloud storage

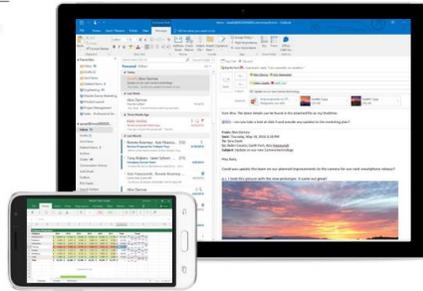

Anywhere it matters: deep dive

Stay productive on the go

Use the best-in-class productivity tools to **work across all of your favorite devices** (including Windows, Mac, iOS, and Android).

Use OneDrive for Business to **create, access, and edit documents whenever you need them.**

[← BACK TO THE DEEP DIVE](#)

Sync files automatically and work offline

Create, share, and edit Word, Excel, PowerPoint documents **any time, anywhere.**

Access and edit documents offline; when you're back online updated files sync automatically. Pick up where you left off on your document when switching devices.

Access your emails, contacts, and calendars across your devices even when offline with Outlook.

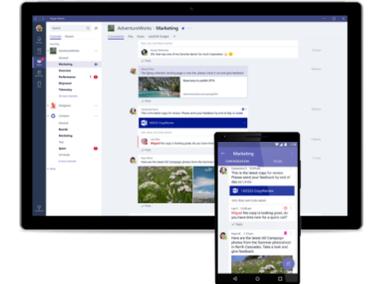

[← BACK TO THE DEEP DIVE](#)

Work together anywhere

With Skype for Business, instant message to answer quick questions, or host or join an online call or video meeting from your favorite device. **Easily present, share and collaborate on documents (or a virtual whiteboard)** within the meeting space.

Outlook Groups and Microsoft Teams are also available any time you're online to help you and your teams **work together collaboratively wherever, whenever.**

Always-on security

Always-on security

Help protect against security threats

Safeguard company data across PCs, phones and tablets

Enable solid security, with simplified management

Get the latest Office 365 and Windows 10 updates

Always-on security: deep dive

Security that travels with you

BitLocker, BitLocker to Go, and Windows Information Protection help **protect business data on mobile devices** by ensuring all business data is encrypted and accessible only by authorized users.

Know that **lost or stolen devices are protected** with Windows 10 built-in encryption capabilities.

Make sure employees always have **access to files while confining company information** using App Protection for Office mobile apps.

Perform a **remote Selective Wipe** of company data easily on lost or stolen devices.

[← BACK TO THE DEEP DIVE](#)

Reduce your security risk

Centralize control of your company data on personal devices.

Apply a **consistent security configuration profile** across managed devices.

Configure devices consistently to help ensure that your data and devices are **protected from malware and external threats**.

Enforce Windows Defender to always be on from within the admin console.

[← BACK TO THE DEEP DIVE](#)

Help protect your devices, data, and people

Help **prevent accidental data leaks** by securely separating business information from personal information with Windows Information Protection.

Further protect Windows 10 devices from unauthorized access using Windows Hello **multi-factor authentication** to strengthen your users' device credentials.

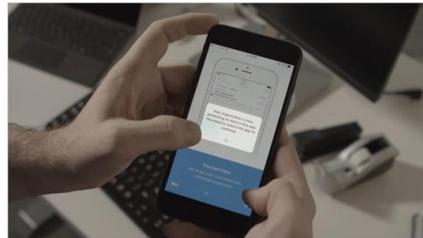

Help **make sure that devices boot securely** and that only trusted software can run during start-up with Windows Trusted Boot used in combination with the PC industry hardware standard, UEFI Secure Boot.

Simplified for business

Simplified for business

Manage users & devices
with a single console

Simplify with a single
login for all devices

Quickly set up new employees
to get them going

Simplified for business: deep dive

Get up and running fast

Save time by easily configuring security features and settings on Windows 10 devices with Mobile Device Management, fully **automating your Windows installation** with Windows AutoPilot, and enabling or disabling Windows Store or Cortana on company-owned devices with Enhanced Manageability.

Reduce hardware costs and simplify management by running multiple operating systems on one Windows device as virtual machines (VMs) with Client Hyper-V.

Deploying and managing Microsoft 365 Business is straightforward – **no advanced IT expertise is required** to set up new devices with all the Office apps your employees need. You can **add and remove users in minutes**, and call if you need support.

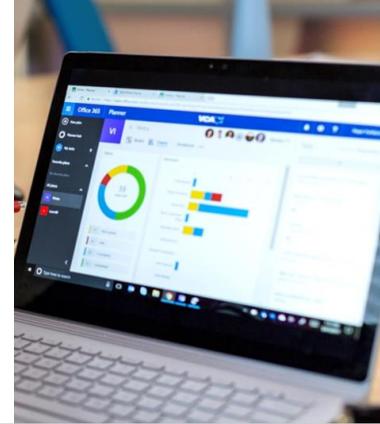

[← BACK TO THE DEEP DIVE](#)

Stay up to date

Keep devices up to date with the latest security updates and feature innovations, **at a pace that is right for you**, with Windows Update for Business. Ensure minimal disruptions for specialized, mission-critical business devices with Deferred Updates.

Avoid time consuming wipe and reload processes and get users and devices up and running quickly with **seamless upgrades** from Windows 7 or 8/8.1 Professional to Windows 10 Pro.

As a cloud-based solution, Office 365 is consistently, automatically updated with new features and capabilities to ensure **you're always working with the latest, best-in-class productivity tools**.

[← BACK TO THE DEEP DIVE](#)

Keep it simple

Microsoft 365 Business simplifies and secures access with a **single login for all services and devices**, making it easier for you to access your work, anywhere, on your devices.
