

## Raymond Pompon

### **How Did the Pandemic Change Cybersecurity**

As the pandemic locked us all down, our threat researchers identified a change in cyber-threats as some attacks declined and others amplified. Most surprisingly, we saw little innovation, but instead saw a shift in forms of fraud. This talk will present data from F5 Labs, which collects and analyze security intelligence across the Internet, as well as the Shape intelligence center. We will look at how the current major threat trends (bots, phishing, web hacks) evolved during the pandemic.

### **Biography**

Raymond Pompon is the Director of F5 Labs. With over 20 years of experience in Internet security, he has worked closely with federal law enforcement in cyber-crime investigations. He was directly involved in several major intrusion cases, including the FBI undercover Flyhook operation and the NW Hospital botnet prosecution. He is the author of IT Security Risk Control Management: An Audit Preparation Plan published by Apress books.
