

## Conner Swalm

### **Don't Get Caught in the Phishing Net**

Phishes come in all shapes and sizes. You have received fake emails, texts, voicemails, and phone calls, but how can you tell if they are scams? How do you know you haven't silently fallen victim to a scam? Let's take a look at popular phishing and how to stay safe in the murky waters of the internet.

### **Biography**

Connor graduated from the University of Delaware in 2018 and shortly thereafter founded Anchor Security Team. Anchor Security Team is a cybersecurity company that focuses on preventing social engineering by "phishing employees before hackers have the opportunity". Connor has spent the last two years studying phishing in order to help companies of all sizes understand their unique vulnerabilities and how to fix them.
