CONNECT.™ Campaign serves as the national cyber security public awareness campaign, implemented through a coalition of private companies, nonprofit and government organizations, as well as academic institutions working together to increase the understanding of cyber threats and empowering the American public to be safer and more secure online; and

Whereas, the National Institute of Standards and Technology (NIST) Cybersecurity Framework has been developed as a free resource to help organizations (large and small, both public and private) improve their cyber security practices through a practical approach to addressing evolving threats and challenges; and

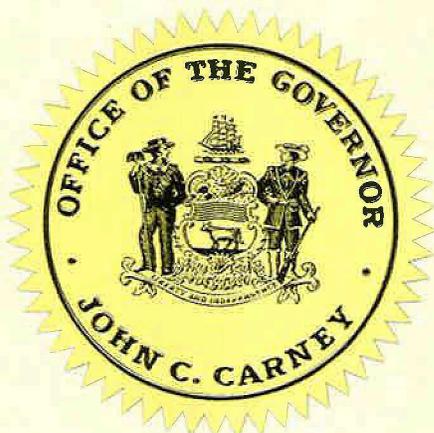

Whereas, maintaining the security of cyberspace is a shared responsibility in which each of us has a critical role to play, and awareness of computer security essentials will improve the security of Delaware's information, infrastructure, and economy; and
